9. (Currently amended) A dental x-ray apparatus having an x-ray tube disposed within a tubehead and the tubehead being supported by a yoke, ~~the improvement comprising~~ the yoke having a control panel to perform control operations.

10. (Previously presented) The dental x-ray apparatus of claim 9 wherein the tubehead is formed from cast zinc or zinc alloy.

11. (Previously presented) The dental x-ray apparatus of claim 9 wherein the tubehead comprises a plurality of components and at least one of the tubehead components is formed from a plastic material impregnated with a radiation absorber.

12. (Previously presented) The dental x-ray apparatus of claim 11 wherein the radiation absorber is a barium compound.

13. (Previously presented) The dental x-ray apparatus of claim 12 wherein the barium compound is barium sulfite.

14. (Previously presented) The dental x-ray apparatus of claim 13 wherein a tubehead component is an x-ray tube holder.

15. (Previously presented) A dental x-ray apparatus comprising:

a tubehead, the tubehead comprising a housing, a collimator, a x-ray tube, high-voltage circuitry including one or more high-voltage transformers, dielectric oil and a

tube holder to support the x-ray tube, wherein the collimator, the x-ray tube, the high voltage circuitry and the tube holder are disposed in the housing and soaked in dielectric oil;

a yoke connected to the tubehead to support the tubehead;

a support structure connected to the yoke to support the yoke; and

a control panel to perform control operations, the control panel being located on one of the yoke and the tubehead.

16. (Previously presented) The dental x-ray apparatus of claim 15 wherein the tubehead is formed from cast zinc or zinc alloy.

17. (Previously presented) The dental x-ray apparatus of claim 15 wherein the tube holder is formed from a plastic material impregnated with a radiation absorber.

18. (Previously presented) The dental x-ray apparatus of claim 17 wherein the radiation absorber is a barium compound.

19. (Previously presented) The dental x-ray apparatus of claim 18 wherein the barium compound is barium sulfite.

20. (Previously presented) The dental x-ray apparatus of claim 15 wherein the control panel is located on the yoke.

21. (Previously presented) The dental x-ray apparatus of claim 15 wherein the control panel is located on the tubehead.
